Dementia Risk

Last Updated 9/5/2024

Step 3

Select 'Yes' for Dementia risk and give it a 'tick'.

Dementia Risk ··· ⊡ ✕ ✓

Search in listbox

No

Yes ✓

This will recalculate your Patient Count to only include those with a dementia risk as per the below eligibility criteria (see Notes).

How would I use this?

You can now navigate any of these reports using this filter. You can either go straight to the Patient List and use that, or you could identify which of these patients are due for a careplan or a health assessment and make a note to include dementia screening in that service.

Notes

Patient Eligibility: To be included as having a 'Dementia Risk, the patient needs to be:

1. Age >= 40
2. RACGP Active
3. Clinic Active
4. No active Dementia/Alzheimer's diagnosis

Risk Profile: Depending on the patient's age and indigenous status, a combination of these factors will trigger the Dementia Prompt:

1. Smoking Status = Smoker
2. Alcohol Consumption = 43+ drinks per week
3. Diabetes Type 1 (Active or Inactive) **OR** Type 2 diagnosis (Active Only)
4. Active Diagnosis = Depression **OR** Atrial fibrillation **OR** Stroke **OR** Hypertension **OR** Insomnia **OR** Traumatic Brain Injury
