

Automatically Submit Your PIP Data Set to Your PHN and Easily Identify Quality Improvement Activities in Your Practice

POLAR fully automates the submission of your PIP-QI reports. POLAR automatically uses the latest data set from the PIP reporting period and submits data to the PHN on your behalf.

Benefits

- ✓ Help practices fulfil their obligation to supply quarterly data to their PHN automatically
- ✓ Reliable, continuous transfer of PIP-QI data from the practices for easier and faster processing
- ✓ Generates pre-populated AIHW compliant data shells for quick submission
- ✓ Both the practice and PHN can clearly identify areas for improvement and export a list of patients to target for action
- ✓ Also compatible with direct aggregated file upload from your clinical software

“POLAR is an innovative platform that helps to improve and better support our work with general practices. It has enabled us to take a leading role in driving quality research in partnership with our general practices.”
